Multiflex casegoods are hand-made in the U.S.A. from laminated and molded plywood. The carefully mitered joinery is expressed in the exposed and profiled multi-ply edges.

The strong all plywood cabinet has either all drawers, all doors or drawer/ door combinations. Every door or drawer is articulated with a unique molded plywood pull. A finished back panel allows the additional flexibility of placing Multiflex anywhere in a room.

Multiflex casegoods are all 60" in length and come in two heights to fit many home or office storage needs. Available in Natural and Classic walnut finishes to match other Cherner products.

Finished back panel shown in Natural Walnut finish.

Natural Walnut finish (clear coat only)

Classic Walnut finish (stain plus clear coat)

# Multiflex

Storage Collection

Cherner®

Drawer and door panels are handmade from 19mm cross-ply Baltic Birch with American Walnut veneer throughout.

Multiflex casegoods use soft closing Blum door hardware and concealed drawer slides.
